AI studio financials

24 accounts: Claude and ChatGPT, team and individual, plus hardware, year 1 and year 2

$2,400
individual accounts per month (6 Ultra + 6 ChatGPT Pro)

$1,200
team seats per month (6 Claude + 6 Business, annual)

$3,600
combined per month, 24 accounts

$48,874
all-in year 1 with the recommended hub, API reserve and Tailscale

Individual and team totals

	Individual (6 Ultra + 6 Pro)	Team (6 Claude + 6 Business)	Combined
Per month, team seats billed monthly	$2,400	$1,500	$3,900
Per month, team seats billed annually	$2,400	$1,200	$3,600
Per year, team seats billed monthly	$28,800	$18,000	$46,800
Per year, team seats billed annually	$28,800	$14,400	$43,200
Per person per month (annual team billing)	$400	$200	$600
Who pays	Each person	The company	

By provider, per month, team seats billed annually

Provider	6 individual	6 team seats	Per month	Per year
Claude	$1,200	$600	$1,800	$21,600
ChatGPT	$1,200	$600	$1,800	$21,600
Both	**$2,400**	**$1,200**	**$3,600**	**$43,200**

Annual billing on all twelve team seats saves $3,600 a year. It commits the company for twelve months, so start with two monthly seats on each side (both plans need at least two) and switch to annual after the pilot passes.

Monthly cost by scenario

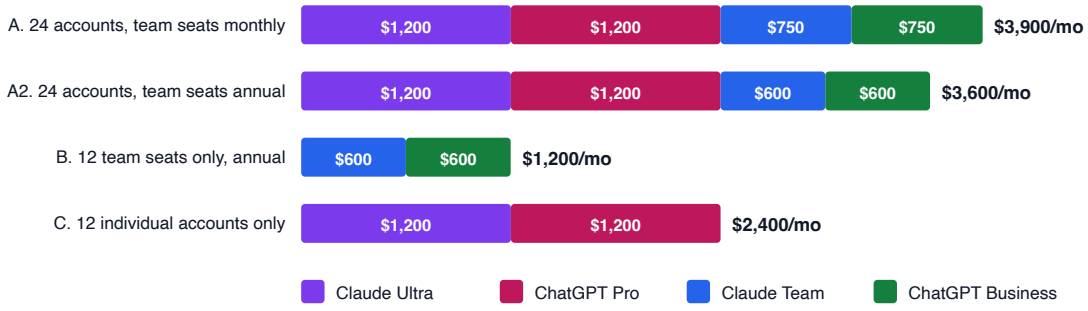

Figure 1. Scenario A is what was asked for. B and C show what each half costs alone.

Price per account

Account type	Monthly billing	Annual billing, per month	Usage, per the vendor	Included API credit	Status
Claude Ultra, personal (formerly Max 20x)	$200	not offered	10x Claude Pro per week	$200/mo, owner's only	verified
Claude Team premium seat	$125	$100	5x a standard seat, at least 5x Pro	$100/seat, pooled, $500/mo cap per org	verified
ChatGPT Pro 200, personal	$200	not offered	Highest individual limits below Pro 500	none listed	check
ChatGPT Business premium seat	$125	$100	5x a Business standard seat	none listed	check

Usage ratios are each vendor's marketing figures and do not compare across companies. They do not predict how much finished work a seat produces, so measure completed tasks per seat during the pilot before buying more.

Claude API credits are claimed, not automatic. New subscribers wait seven days, credits expire each billing cycle, and they do not pay for interactive Claude Code use. Six Claude Team seats give one company pool of $500 a month. Each Ultra credit belongs to its owner and cannot be moved to the company.

> OpenAI's pricing pages block automated reads, so the two ChatGPT prices come from CloudZero's guide (updated 21 October 2026) and Endless's guide (19 October 2026). They are tagged "check". Confirm them on chatgpt.com/pricing before buying. One guide says new Pro 200 subscriptions get a lower allowance than before.

Year 1 cost by hub choice

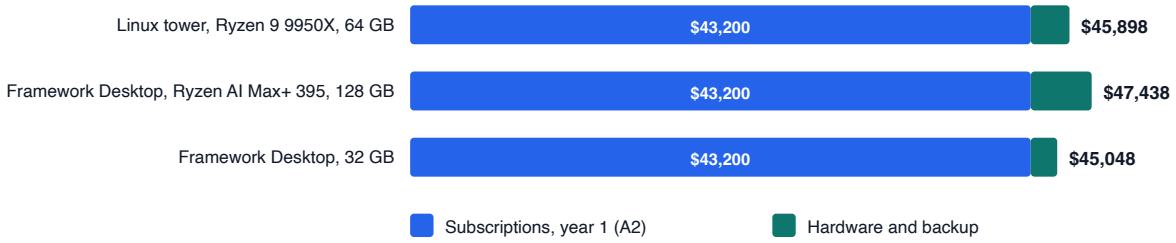

Figure 2. Subscriptions are 94% of year 1 with the recommended hub. The hub choice moves the total by at most $850.

Year 1, recommended build, team seats billed annually	Amount	Share
6 Claude Ultra (paid by each person)	$14,400	31%
6 ChatGPT Pro (paid by each person) check	$14,400	31%
6 Claude Team premium seats (paid by the company)	$7,200	16%
6 ChatGPT Business premium seats (paid by the company) check	$7,200	16%
Studio hardware, one time	$2,599	6%
Offsite backup estimate	$99	0%
Total year 1	**$45,898**	**100%**
Personal share (Ultra and Pro)	$28,800	
Company share (team seats, hardware, backup)	$17,098	
API reserve above credits, $200/mo estimate	$2,400	
Tailscale Standard fallback, 6 users at $8	$576	
All-in year 1 cash plan	**$48,874**	
Year 2 onward, subscriptions and backup only	$43,299	

Hardware detail

Recommended: Linux tower, Ryzen 9 9950X, 64 GB

Item	Price	Status
AMD Ryzen 9 9950X, 16 cores	$549	check
64 GB DDR5 (two 32 GB sticks)	$880	check
AM5 motherboard with 2.5 Gb Ethernet	$230	estimate
2 TB NVMe SSD	$200	estimate
Case, 850 W power supply and air cooler	$250	estimate
UPS, 1500 VA line-interactive	$250	estimate
Backup drive, 8 TB	$180	estimate
Gigabit switch and Ethernet cables	$60	estimate
One-time total	**$2,599**	

Larger: Framework Desktop, Ryzen AI Max+ 395, 128 GB

Item	Price	Status
Framework Desktop DIY edition, 128 GB	$3,449	check
2 TB NVMe SSD	$200	estimate
UPS, 1500 VA line-interactive	$250	estimate
Backup drive, 8 TB	$180	estimate
Gigabit switch and Ethernet cables	$60	estimate
One-time total	**$4,139**	

Minimum: Framework Desktop, 32 GB

Item	Price	Status
Framework Desktop DIY edition, 32 GB	$1,139	check
1 TB NVMe SSD	$120	estimate
UPS, 1500 VA line-interactive	$250	estimate
Backup drive, 8 TB	$180	estimate
Gigabit switch and Ethernet cables	$60	estimate
One-time total	**$1,749**	

What is not in these numbers

- Tax, and actual API spend. The $200 monthly reserve is a cap to set, not a forecast.
- OpenAI API usage for unattended GPT jobs. ChatGPT seats include no API credit in the guides checked.
- Extended warranties and electricity. A tower that sits idle most of the day and works hard during rounds may use 100 to 250 watts, a few dollars a week.
- GitHub, Vercel and Supabase plans, which do not change with this setup.

> Prices change. Before buying, rerun `src/build.py` after updating the numbers in `PRICES` and `HARDWARE`. Every figure in these reports comes from those two tables.

Prepared October 31, 2026 for Et. Prices tagged "verified" were read from the vendor's page on that date. Prices tagged "check" come from recent pricing guides because the vendor page blocked automated reads. Prices tagged "estimate" are placeholders that need a quote before purchase.
